

## SONITROL PROVIDES THE BEST SECURITY OPTIONS TO FIT YOUR NEEDS.

SMALL BUSINESS • LARGE BUSINESS • CORPORATE OFFICE • MULTI-TENANT

### INTEGRATED PROTECTION.

Property Managers face unique challenges and can be susceptible to danger. Unauthorized individuals are often free to enter and roam about. Do you know who has access to your building?

Your business has a lot of responsibility when it comes to keeping their tenants and facilities safe and secure.

Sonitrol offers an integrated, modular suite of sophisticated security solutions that can help protect your business and your people. Plus, our state-of-the-art technology—including verified audio and video intrusion detection and verified video surveillance—is backed by a team of highly trained professionals at a Sonitrol Central Station.

## SECURITY TIPS

### 1. User And Entry Management

Having multiple properties with various tenants and needs for each building you can run into access issues. Keys can be expensive and unreliable when you don't know who has them. With Sonitrol access control you can have piece of mind knowing that only authorized users have access to enter your facility.

With our mySonitrol online platform you can manage all your properties in one place. You can add and edit users, change access levels, and set locking schedules any time and anywhere.

### 2. Tired Of Dealing With Multiple Vendors For All Your Needs:

With Sonitrol you can get everything you need from one company. We offer integrated solutions for intrusion detection, access control, and video surveillance. We not only install the equipment, we also provide 24/7 monitoring, and priority service for our customers. Sonitrol also gives you an all-in-one solution when it comes to fire detection. We offer; installation, service, monitoring, along with quarterly or annual inspections.

When you combine these solutions with our 24/7 monitoring station we can provide authorities with a Verified Alarm. This leads to faster response, lower false alarms, and more apprehensions.

### 3. Viewing Your Properties:

Video technology can be a powerful deterrent to both external and internal theft. It can also provide evidence and help protect you from false slip-and-fall claims, vandalism, and more. It can be a pain dealing with multiple camera vendors and viewing platforms. With our video surveillance solutions you will have the ability to view all of your properties in one site.

With our SonaVision solution we can help keep your property and tenants more secure. Features include

- Video clip of what happened before and after the alarm was triggered
- Event notification via e-mail
- Remote video access so you can evaluate employees and procedures from anywhere

### 4. Monitoring Visitors

If your properties has a lobby or receptionist and you want to see who is checking in. We suggest adding a camera facing your front door. For an extra level of protection you can add a panic button under the receptionist desk in case of any issues. With our new multi-sensor you will be able to tie your panic button into your camera so if the panic is pushed our monitoring station will get live video and audio of the situation.
