

1. Open Vigil Client software
2. Open **Server**
3. Select **Cameras**
4. Select **Quick Export**

5. Choose the date and time frame you want
6. If you are only wanting a specific camera, click **Advanced**
7. Choose **export destination**
8. Choose what camera you want to view
9. Click **Start Export**
10. Your file is saved to destination, from this point you can just keep it on your computer or save to USB to give to authorities.

11. If you want to save a still image from the video click the purple flash drive on bottom
